

**THE PROJECT REPORT OF**

**NAME: - SUBODH KUMAR**

**Registration Number: - 1475194**

**ON**

**EDUFORD COLLEGE WEBSITE**

**National Institute of Electronics  
and Information Technology**

In partial fulfillment of the requirement of the award  
of the degree of

A LEVEL PROJECT

TO

NIELIT, INDIA

## **PERFORMA OF THE PROJECT COMPLETION CERTIFICATE**

This is to Certify That The Project Work done at E-Commerce BY **Mr./Ms.**  
**SUBODH KUMAR (NIELIT Registration Number 1475194)** In Partial Fulfillment  
of NIELIT 'A' Level Examination Has Been Found Satisfactory. This Report Has  
Been Submitted for any Other Examination and Does Not Form Part of Any Other  
Course Undergone by The Candidate.

It Is Further Certifies That He/She Has Appeared In All The Four Modules Of  
NIELIT 'A' LEVEL Examination.

## **ACKNOWLEDGEMENT**

We Like To Share Our Sincere Gratitude To All Those Who Help Us In Completion Of This Project. During The Work We Faced Many Challenges Due To Our Lack Of Knowledge And Experience But These People Help Us To Get Over From All The Difficulties And In Final Compilation Of My Project.

I Consider Myself Privileged Having Found An Opportunity To Express My Sincere Thanks To **Mr. VIKAS SHARMA**, My Teacher Who Granted Me This Project And Provided His Consultant Help And Guidance Throughout The Entire Span Of Project.

I Appreciate His Interest And Concern Regarding The Project.

I Am Very Thankful To **INFOTECH SOFTNET** For Providing Me All Resources To Make The Transitions From Classroom To The Corporate World Possible.

## **DECLARATION**

I Here By Declare That This Project Work Titled "**Eduford College Website**" Is My Original Work And No Part Of It Has Been Submitted For Any Other Degree Purpose Or Published In Any Other Form Till Date.

## 1. Introduction

Discover a world of opportunities at **Eduford college**. As an institution dedicated to academic excellence, innovation, and holistic student development, we are committed to providing a vibrant learning environment where students can thrive and achieve their fullest potential.

At **Eduford college**, we offer a diverse range of programs designed to cater to the academic interests and career aspirations of our students. Whether you're pursuing a degree in business, engineering, humanities, sciences, or any other field, our experienced faculty and state-of-the-art facilities are here to support you every step of the way.

Beyond academics, we believe in nurturing well-rounded individuals. Our campus is a hub of cultural diversity, extracurricular activities, and community engagement opportunities. From student clubs and organizations to internships and study abroad programs, there's something for everyone to explore and enrich their college experience.

As you navigate our website, you'll find valuable information about our academic programs, admissions process, campus life, and more. Whether you're a prospective student, current student, faculty member, or alumni, we invite you to explore all that **Eduford College** has to offer and join us in shaping the future together.

Welcome to **Eduford College**, where your journey to success begins!

## 2. Features

- Online Classes.
- Students can access any details regarding college from anywhere.
- Students easily ask their queries related to any course.
- All information about the college and Facilities is provided on the website.
- Easy to navigate.
- Anyone can visit our website and access information any time through internet.
- Global advertising of our courses.

### **3. The Mission Of The Project**

The purpose of our project is to design, publish and maintain a website for our college which consists of all information regarding the college like infra, course, admission, faculty and contact details. As we know that today web is growing day by day people are aware of the internet and its technology there is number of sites that provides number of services to the number of the customer as the online market, online share trading online banking, online book shop, etc. so that my project guide advised me to develop a site to provide course in the college related course there are some objectives of the sites.

1. The main objective of the Web site is to provide complete details of our course to more and more learners.
2. Student can remotely access course detail from everywhere.
3. They can reach us by phone calls, Email or college visits.
4. college can share any updates to its user at any time.

### **4. How The Project Works**

With help of this website, visitors can get all information about the college on the about us page. On the course page, visitors can get course detail like course fee, duration, batches and contents as well. A blog page is a site that is updated with new information on an ongoing basis and normally consists of a collection of posts. We have mentioned our contact detail on contact page, so students can reach us by any mode like a phone call, Email or direct to visit our place. Students can freely visit any page on our website. On the contact us page we provide our social media links to connect with our visitors.

### **5. Drawbacks Of Current Manual – System**

The current manual – system is :-

- 1) The current manual system has a lot of paperwork and it does not exactly work.
- 2) To maintain the records of student's records, fee reports and batch detail manually is a time-consuming job.
- 3) It is tough to manage the bulk of record manual.

- 4) With a manual system we can reach a limited number of people.
- 5) In the pamphlet we can put only limited detail.
- 6) Visitors can only visit in office time that is limited.

## 6. Advantages Of The Proposed System

Initially, the college authorities had the feeling of maintaining a comprehensive website for information exchange apart from the existing manual system. We used all the possible ways to monitor the data and maintain and format the data requested by the authority. Also to formulate the text to embed into World Wide Web. The data is about to change all the time so we will update it all the possible. Here are some advantages of the Website.

- I. Provides all the comprehensive information about college.
- II. Students can access any details regarding college from anywhere.
- III. Students easily ask their queries related to any course.
- IV. All information about the college and Facilities is provided on the website.
- V. Proper information regarding the fee and payment mode.
- VI. Easy to navigate.
- VII. Anyone can visit our website and access information any time through internet.
- VIII. Global advertising of our course.

## 7. Module

- ❖ Home: - clicking on the home tab will show the home page.
- ❖ About: - clicking on the about tab will display the about screen.
- ❖ Course: - clicking on the course tab will show the course page.
- ❖ Blog: - clicking on the blog tab will show the blog page.
- ❖ Contact: - clicking on the contact tab will show the contact page.

## 8. Technology Used

The three fundamental programming languages work together to create websites that are as functional as they are beautiful. The

beauty of these languages is that each has a unique role to play in website functionality. If you are at all familiar with web design fundamentals, you've heard of the holy trinity of coding languages is HTML, CSS and JavaScript.

- HTML
- CSS
- JavaScript

### **HTML :-**

HTML stands for Hyper Text Markup Language is the Markup language of creating web pages and other information that can be displayed in a web browser. HTML is written in the form of HTML elements consisting of tags within the web page content. The purpose of a web browser is to read HTML documents and compose them into a visible or audible web page. HTML allows images and objects to be embedded and can be used to create interactive forms. Here in the web site, HTML is used to create the interface of all web pages. HTML structured their tables, lists, image gallery.

### **CSS :-**

CSS stands for Cascading Style Sheets. CSS is a style sheet language used for describing the presentation semantic (the look and formatting) of a document written in a markup language. Its most common application is to style web pages written in HTML. CSS is designed primarily to enable the separation of document content from document presentation, including elements such as layout, colors, and fonts. This separation can improve content accessibility, provide more flexibility and control in the specification of presentation characteristics, and enable multiple pages to format, and reduce complexity and repetition in the structural content. It can also use to allow the web page to display differently depending on the screen size or device on which it is viewed.

### **Java Script :-**

JavaScript is the language programmers use to energize your website's design. JavaScript is a lightweight object-oriented programming language that is used by several websites for scripting webpages. It's the language that takes your website from just text and links to the robust , interactive websites you know and loves. Java

script allows web designers to bring your website to life. It has allowed the creation of such website standard features as:-

- \* Autocorrect and autofill
- \* Roll-over menus
- \* Validating form information
- \* Animated page elements

## 9. Hardware Specification

<b>SN</b>	<b>Components</b>	<b>Specification</b>
1	Processor	i3/i5/i7
2	Clock speed	2 GHz or more
3	RAM	2 GB or more
4	Hard Disk	40 GB or more
5	Mouse	Optical Mouse

## 10. Software Specification

<b>SN</b>	<b>Software</b>	<b>Specification</b>
1	Text Editor	Notepad / Notepad++
2	Browser	Internet Explorer/Google chrome/ Firefox
3	Windows	Window 7/8/10
4	Hard Disk	Photoshop/Canva/Any Online photo Editor
